E. H. POLLARD, Esq. The Scheme of a Local Bank for this Colony wit Bracches at the most important phoes in Chins, has been in contemplation for a very long period.

The local and foreign trade in Hongkong and at the open ports in China and Japan has increased so rapid-It within the last few years that additional Bunking facilities are felt to be required.
The Banks now in China being only branches of Corporations whose head quarters are in Eng. land or India, and which were formed chiefly with the view of carrying on exchange operations between those countries and China, are sourcely in-

a position to deal satisfactorily with the local trade which has become so much more extensive and varied than in former years. This deficiency the Hongkong and Shanghai Banking Company will supply, and will in fact or the same position with relation to this dolony as the Presidency Banks in India, or the Banks of Australia in their respective localities. The Establishment of a Mint in Hongkong providing an adequate supply of proper currend will render a local Banking medium essential t chary out its operations, and the almost certain disappearance of the existing Compandoric system (so far as money is concerned) will also ensure Banks becoming in course of time the exclusive The above named corporation has been organi- medium for the transaction of the monetary ope- Deceased make early payments at the Office of For the anticipated success of this enterprise this city, and with the interior of this State, there are therefore ample grounds; and the great

local body of Proprietors or Shareholders whose With the view of giving to the business of the support naturally forms a chief element of remu-NOTICE. EDUCATIONAL

ST. SAVIOURS SCHOOL, Pottinger Street carner of Wellington Street IT is most respectfully intimated to Parents and Guardians, that, the New School lately created in Pottinger Street corner of Wellington Street. in a style suitable to the wants of the climate and managed with a view of meeting the peculiar want of this Commercial Colony, is pay in full operation. The system of tuition adopted in these Schools

is purely Commercial, Arithmetic, Book-Eceping-Geometry, Gangraphy, History, Grammar, Com, position, Foreign Languages, Music, and Drawing, are taught by proficient resident Masters.

No objection is made to the admission of any Pupil on the score of religion nor will the religious facings of any pupil be tampered with.

On March next, a suite of large Airy Rooms, will be opened in the same Schools for the reception of Boarder Pupils. To Boys leaving home for the first time, the change will be made as easy as can be by the kindness which shall be shown them and by the exclusion of everything materially Further particulars may be known by applying

to the Principal T. Ratuoxot, who carnestly desires that communications be made before the let of next month.

ST. SAVIDURE SCHOOL Hougkong, 6th February, 1864.

Shins of War. Admira Sir E. Belol or read a paper on "Improvements in the Sfructure of Sline of War He considered cont our ships of war meded a more protection than would keep their hulls safely firsting, with such protection for those fighting the guns as might be deemed sufficient to keep of shells and musketry, heavy shot to pass freely through instead of causing spiral showers of splinters such as resulted from the destruction of the late targets at Shuchuryness. The present paper therefore, dealt with a mode of construction adcounte for contanding with ordinary betteries, and nlso permitting external planking, and consequent.

Is the old copper sheathing below water. It had

been so generally assumed that no thickness of armour plate could be employed which would resist our new monster ordnance, that his attention had here directed to meet the difficulty halfway, by protecting themere vital shell of the lower buil, so s to dely the ordinary manual of any gunbearing vessel which should not by its socu unlated weight or mass of matter render defence impossible. It was important, that such a tonnage should be prosided as should, as in the case of the Warrior olass, he capable of floating the contemplated armnment independent of the forward and after compartments which might be assumed as mere assistant means of flotation, and to be so fitted with celiular divisions below the level of flutation as to render in. jury to those parts below the reach of shot of very triffing importance. In order to sutiefy the mean of offence, our attention ought to be direted to the concentration of every mun embarked on objects either ahead or asters, bearing in mind that, under | feet by 40 feet. tle threat that " no armour can withstand the contemplated guns, we must calculate on their amployment as much as possible near the line of axis of the vessel. It was constantly ass ried that the Warrior plates would stand no chance against the toonstor guns of which so much was predicted : but the question was whether some other mode o uld not be devised of applying the same weight of the present tallant.

to greater advantage, or assuming that it was pens.

Apply by letter to H, care of the Office of this could we not avoid risk to the vitality of the ship by the friery to be inflicted ? He thought he saw his way to a remedy, which he would explain. Now, assuming that an iron spherical shot of 13 inches was the missile to be dreaded, the opeation to be considered was not exactly what flat plate of iron was to resist it-for the authorities stated that no reasonable thickness, even up to 12 and H. Dunner & Co. inches could withstand the impact. Looking, however, only to the floating caronse of the ship, and disregarding the ports until we had an impreganable stage on Which to place guas, then we should by at liberty to increase the thickness to any amount. His proposition was to construct the ship on the distomary plan of close iron ribs, but filling up the interstices between the iron with condensed tault. Now, assuming that we constructed a venset with 36 inches depth of rib at the vulnera lopartions which shot could reach, which would prohably involve 12 vertical feat of her side - say 8 bulow water and four above-we should then have a vessel of stronger framework than any now built building, or in contemplation. Then, assuming 4. GODOWNS at Wavonar. Rent moderate. that those iron ribs presented 2 inches at the exterior, inpering in 36 inches to one inside, placed 6 inches anunder, and filled in with compressed timber or other matter, we should have per cubic yard of bulwark 3,412 125lb; that of the Warrior being 3,123lb.. showing only a cofference of about | ing a frontage of Eighty three feet on Wellington 200)b to the cubic yard. It was yet to be deter- and Gago Streets and of two hundred and twenty mined by actual experiment whether that resist inine feet on Aberdeen Street, comprising a sutance would offer the protection sought. Perhaps perficial area of about 19000 equare feet. it would not, but he he proposed to add a 6-inch |tive danger with our present ironelads would be reduced to nil or at least to comething which would satisfy the seamen. His plans for the final construction and fortifications werk not yet complete, but they would probably be laid before the Government in March next. On a previous occasion be had alluded to paper as an opposing medium. In 1816, at Algiors. a ream of fuolecap, end on rewisted a 881b, shot from a 27 feet gun, at 76 yards; and in 1854 he proposed to the Admiralty to constuct moveable battery rafts of brown paper, but the dasign was not carried out. Lately he learn from a newspaper that, tip years after his proposal if was found that paper of t-inch thickness was Bred at and not quite penstrated, while a similar shot went quite through 10 inches of good oak. In conclusion, he would observe that acondensed millhoard weighed less than onk or teak, and, intermused in the manner he had suggested, might form it target which would set even Big Will at difance.

Our New York advices are to the 8th, and via Ounada to tito 10th (per mail steamer Jura) .-The following is an extract of a private letter from Lientenant-General Grunt, dated headquartere, City Point, Va., 16 :- "Latate to all gitisons who visit me htat all we want now to ensure an early restoration of the Union is a determined unito of sentiment North. The rebels have now in their ranks the last man. The little boys and old Gardens, Praya-substantially-built. Capacimen are guarding prisoners and railroad bridges, and forming a good part of their garrison for entrenched positions. Any num last by them cannot be replaced. They have roobed the cradic and the grave. Besides what they lose in frequent skirmishes, they are now i re from deertions and other causes at least one regiment per lay. With this draid upon them the end is not for distant if we will only he true to urselves. Their only hope now is in a divided North, This. might give them reinforcements from Tennesses. Kentucky, and Missouri, while it would weaken us. With the draft quietly enforced the enemy would become despendent and could make but little resistance. I have no doubt but that the enemy are. Outhouses. Carden, and englosing Wall, Bent exceedingly anxious to held out until after the 850 per month. presidential election, they have many hopes from its effect. They hope a counter-revolution; they hope the election of the peace candidate. In fact they hope like Machawber for something to turn un. Our peace friends, if they expect peace from separation, are much mistaken to have peace on any terms. The South would demand restoration of their slaves freed, they would demand indem-nity for losses stained, they would pay for the restoration of every slave pseuping to the North."

America.

Human Longevity. We glean the following curious lacts from a work which has just appeared under the title : "Ito is Longevite Humane." by Dr. Guyotant, who has himself reached the patriordial age of 88. In 1777 average life in France did not exceed 23 years. In 1793, it had risen to 26 years and three months; in 1836 it was 33 years, and at pre- of Houses joining in corner of Hollywood sent it has reached the very high figure of 39, an & Road and Aberdeen Street, each has Six cents per Sheet. increase of six years within a period of 28 years! This is evidently owing, first, to the great efforts made of late to remove insalubrious nuisances, to provide towns with a proper system of sewerage, drain marshes, etc., and then to the great progress made in - medicine, and the abundance of wholesome food and every necessary comfort now at the command of all but the hapelessly indigent who are of themselves the object of much greater nolicitude than formerly. There exists intimate connexion between the longevity of animals and the time of their gestation and aubsequent growth. The gestation of the rabbit lasts 30 days; that of mon nine months, that of the elephant two years. The stag attains its full stature in the course of eix years, and it lives about 40. In man, the bones increase in length antil 20, and in thickness until 40; M. Flaurens fixes the natural term of man's ile at 100 years. Death in man appears to be neither more nor less than essification arrived at its extreme limit; accordingly some years ago a chemist maintained that life might be prolonged by taking lactic soid the chief ingredient of buttermilk, which tends to disselve bone. Dr. Guyetant lays it down as a general role that those live long who do not do more than their strongth permits but yet regularly employ all the strength they have. Besides a physical, there has been an intellectual, progress. During the ten years ending with 1860, there has been a diminution of 34 perout in the number of persons accused of crimes Albany, and Public Gardens, at present in the and deliquencies. Out of 62,425, persons condem- occupation of the Oriental Bank, ned. 846 only were under 16, but from 16 to 20 The Bungalow contains six large the number was 9,028. From the age of 41, the Bath Rooms, Closets and Spacious Verendabs detached out Offices, three Stall Stable and Conches their age forceses. In 1817, it was found that House. The Garden is laid out, and the premises. out of 1,000 conscripts there were 577 who could supplied with Town Water and a Water Fountain. not read. From 1831 to 1835, the number of illiterate conscripts per 1.000 was only 480; from 1841 to 1845; only 400; in 1851; only 350, and in 1859 not more than 200. This shows that clonentary instruction has advanced together with the general well being of society.

SAN FRANCISCO. 1st October. The number of vessels in port is still large but the offerings are light, and we hear of but few engagements beyond regular lines. Such as have come to our knowledge are as follows: The ship Glee Malden has a charter for Callan; the Lebanon will lead lumber at Puret Sound for Melbourne, at 43 10s; the Peter Joynson will carry spare from Puget Sound to England, on terms withheld; the Oracle has been taken up in Keepmanschap & Co. s line for Hongkong; and the brig Gazelle has been chartered to load guane at the Chinches for Rotterdam at £3 10s, proceeding first to Acapulco, with a sarge from this port—all British reveals. We can hear of no charters of any American vessels since the late of last reference, and the majority of those in port will probably clear in ballast, seeking cargo in other ports.

The bag pleed upon Pereign vessels by the Collector of Port Angelos having been nullified by the Scoretery of the Treasury, they may a new proceed as heretofate to ports on the Sound.

The following vessels have been despatched during the period above named: Daniel Marcy, Sophie & Holens and Empress of India, for Hong kong; Ce lyle, Squan Ai Blaisdell and Winged Hunter, for Callau; Intropid, for Callao, via Port Angelos; Mionar for Sydney; Lebanon, for Melbourne, via Puget Sound; and Thus, Fletcher, for Honglulu, in ballast. Melbourne, at 43 10s; the Peter Joynson will carry spare from Puget Sound to England, on terms withheld; the Oracle has been taken up in Overcoats.

Of the vensus in port, the destination is known of the following: Ship Invincible, for New York; ship Black Prince, for Boston; ships Oota d'Or, Georges and Oracle, for Hongkong; barks Smyrnista, Yankee and Young Hestor, for Honglula; ships Peter Joynson and Shamrock, for Englant, via Puget sound; ship Glos Malden, for Callao; bark Trieste, for Valparaiso; barks Catalina and Sarita and briga Gazelle and Sunny The destination is unknown of the following: Ships Alhambra, Alice Ball. Bolvedere, Caroline Reed, Denis Affre, Dublin, Elizabeth Kimbad. Egena, Gon, Grant, Holios and Sumafra; barks D. C. Murray, Dominga, Electra, Florida, Fanny Major, Glaneur, Minerya and Cruguay; brigs Annette, Josephine, Kentucky and Trimandra.
